

Bring your world to life

Colors influence the way we feel mentally and physically. Purple has a relaxing calming effect, ideal for preparing to sleep, unlike the color yellow which is mentally stimulating making us feel more awake.

The colorwash downlight kit has the ability to continuously change the color of your bathroom lighting, bedroom or living room lighting.

Especially effective with white backdrops it creates a stunning effect when used behind a white voile curtain. It also provides highly effective bathroom lighting when used over showers or baths to change the color of the water.

With the option to fix on white light and with directional and highly focusable fittings, this kit is also particularly suited to display lighting such as within shelving or alcoves.

Illuminator

The standard illuminator supplied with this kit is a 100W tungsten halogen unit with 1 plug. As standard this illuminator outputs continuously changing colors. The colorwheel can be removed to allow for static white light output, or can be replaced with a twinkle wheel to give a sparkling effect.

Dimensions: 11.26" (286mm) x 6.1" (155mm) x 4.68" (119mm)

LED Illuminator

Optionally, you can also choose either of our new LED illuminators.

The MicroLED 4000 measures only 5.1" (106mm) x 3.7" (94mm) x 2.7" (68mm) yet features full remote control operation which allows you to control the light color and color-cycling effects from the comfort of your armchair.

Alternatively, opt for the MicroLED 1000. This tiny but powerful unit features color cycling and static color output. Measures only 4.9" (100mm) x 3.3" (83mm) x 2.6" (99mm).

Both LED illuminator options are completely silent in operation.

Fiber optic harness

Starting from 6 tails and going up to 9 tails, this will be supplied with lengths from 4.92 feet (1.5m) to 23 feet (7.0m) depending upon the kit you choose.

The End Fittings

Acrylic eyeballs are supplied as standard, and are available in either a white, chrome or black finish.

Optionally for a small extra cost you can choose stainless steel flush fittings.

40mm cutout required for all fitting options

Name	Light Source	Number of fittings	Length	Power Supply	Environment
CWD6A	100W	6	6.56 feet (2.0m) - 9.84 feet (3.0m)	One 110V power supply	Indoor/Dry
